

Summary of Igalia's contributions to Chromium in the past year

Mario Sánchez Prada
BlinkOn 10 / April 10th, 2019
(Toronto, Canada)

About me

CS Engineer & member of **Igalia's** Chromium Team

- **GNOME:** [Contributor](#), [GNOME foundation member](#)
- **WebKit:** [WebKitGTK](#), [Linux Accessibility](#)
- **Chromium:** [Servicification](#), [Onion Soup](#)

Servicification

- [Network Service](#) (//services/network)
 - Migration to the network::SimpleURLLoader API
 - **Enabled** on **Mac/Win/Linux/CrOS** since **March**
- [Identity service](#) (//services/identity).
 - Migration to the new IdentityManager API
 - Weekly status report at [identity-service-dev ML](#)

600+ CLs landed between April '18 and March '19

Onion Soup & Code Health

- Started this collaboration in February 2019
- 450+ CLs merged so far, including:
 - Make more Blink classes garbage collectable
 - Merge duplicated APIs / remove unused ones
 - Change long, short... to int32_t, int_16...
 - Replace WTF::RetainPtr use with base utils
 - Clean up unnecessary Create() methods
 - Drop usage of net::CompletionCallback
 - ...

CSS

- [CSS Grid](#):
 - Implemented new Baseline Alignment algorithm
 - Change behavior of % row tracks and gutters
 - Updates to follow spec changes & bugfixing
- [CSS Containment](#):
 - Avoid extra layouts on LayoutText::SetText
 - Introduce CompositingInputsRoot
- [CSS Text](#):
 - white-space: break-spaces / line-break: anywhere

Accessibility

- ATK support for Chromium's UI and Blink content
- 2 new OWNERS for Linux a11y (Joanie, Martin)
- TODO: Live region events, text selection, bug fixes

Goal: Chromium + [Orca](#) usable by [GNOME 3.34](#)

V8

- Implement `Object.fromEntries()` method
- Optimize the `ObjectLiteral` spread syntax
- Add Private Methods (WIP)
- Add support for `BigInt` in WebAssembly API (WIP)

... a bunch of other misc stuff ...

Ozone / Wayland

- Working on this **since end of 2016** ([meta bug](#))
- Ozone/Wayland platform is **fully upstream** now:
 - All features from non-Ozone Chromium/Linux
 - Supports Native GPU memory buffers and Zero-copy
 - TODO: HiDPI support, File dialogs, tab drag support
- 2 new OWNERS:
 - Ozone/Linux (Maksim), Ozone/Wayland (Maksim, Antonio)

See [Maksim's talk](#) for more details!

MathML

- W-I-P branch implementing MathML support
- Basic support implemented based on LayoutNG
- Plan to refine and upstream work during 2019

See [Fred & Rob's talk](#) for more details!

Other contributions

- Fixed interoperability issues with [text selection/editing](#)
- API to manage [spatial navigation in <webview>](#)
- Support for memory pressure handler in [CC](#)
- Contributed to [Origin-Signed HTTP Responses](#)
- 1 new OWNER for navigatorcontentutils (Gyuyoung)

...plus several other changes & fixes [here and there](#)

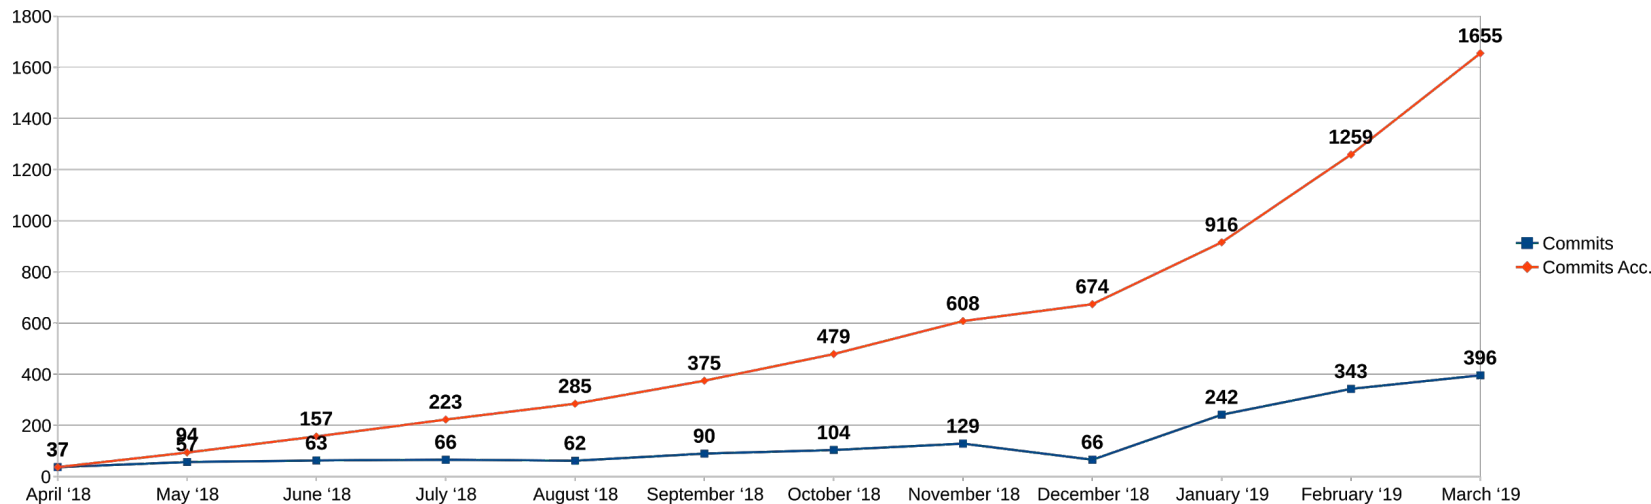

Some stats & numbers

Second biggest contributor in number of commits!!

(excluding bots and *@chromium* addresses)

```
$ git log --since="1 April 2018" --until="1 April 2019" \  
  | grep ^Author: sed -r 's/^.*<.*@(.*)>$/\1/' \  
  | grep -v gserviceaccount.com | grep -v chromium.org | sort | uniq -c | sort -g  
  
[...]  
218 microsoft.com  
362 samsung.com  
373 gmail.com  
516 intel.com  
746 opera.com  
1534 igalia.com  
8952 google.com
```

Some stats & numbers

- More than **1650 CLs** merged (including V8), with **growing trend**
- **24 igalians** contributing to several **different areas**:
s13n, Onion Soup, CSS, a11y, Ozone/Wayland, MathML, V8, WebAssembly...
